

Java Code

```
1  public class Car {
2      private String modelName;
3      private String Car;
4
5      public Car(String modelName){
6          this.modelName = modelName;
7      }
8      String getModelName(){
9          return modelName;
10     }
11
12     void setCar(String Car){
13         this.Car=Car;
14     }
15     String getCar(){
16         return Car;
17     }
18
19
20
21     void displayModel(){
22         System.out.println();
23     }
24
25     String getstartEngine(){
26         return "Start Constructing a " + Car;
27     }
28 }
29
```
