

Java Code

```
1  public class SportCar extends Car{
2
3      public SportCar(String modelName){
4          super(modelName);
5      }
6      @Override
7      void displayModel(){
8          System.out.println(getstartEngine());
9          System.out.println("Beep! I am an "+getModelName());
10     }
11
12
13
14 }
15
```
